Hi Larry,

Thank you for your email and the attached documents. I've asked Bob Egan to reply directly to Kristin on the technical issues raised in the Problem Solutions document.

I noted that some of the issues raised in the document require more than a technical response. I would like to propose that we schedule a meeting, either in-person or by telephone, to discuss the issues raised regarding the timing and scope of the EPA-lead work, as well as how we can optimize our efforts on the site.

We are scheduled to meet with WDNR on February 4th to discuss how we can improve communication and coordination of the PECFA work. I recommend a meeting with the tribe sometime after February 4th.

Please let me know if you agree with my proposal. Thanks.

Margaret

Subject: RE: Letter to Kozaks

Hi Margaret,

Thanks for sending me a copy of the letter to the Kozaks. The letter specifically addresses the requirements of cooperating and communicating with the Tribe and EPA in a timely manner. Hopefully, the Kozaks and REI will comply.

Attached are files that summarize the information the Tribe has received or not received to date, a file that identifies problems and solutions and a file of all the information we received.

Staff and I are a bit concerned with the quality of the data collected thus far and wonder if it will be good enough to define the site in order to remove the contaminated soil? The yellow highlighted areas indicate either missing or inconsistent data. Please let me know if you have the same information or more?

I would anticipate the letter you sent to the Kosaks will help rectify some of these concerns. I am hopeful.

Please review and when you get a chance give me a call to discuss.

Thanks again!

Larry
